

# Index of design documents on the library statistics\_lib

---

- Intended use, functionality and general design of the [library](#)
- Calculation of the quantiles, mode(s), histogram and rank correlation coefficients - [DE001](#)
- Design and implementation ideas on classes implementing continuous and discrete random distributions - [DE002](#)
- Design and implementation principles on the special mathematical functions - [DE003](#)
- Definition and properties of inverse distributions - [DE004](#)
- Definition of the statistical tests - [DE005](#)
